

# CREDENTIAL CAM

## Digital Photo ID Webcam

With its five layer glass lens and Autosmart facetracking, the Credential Cam is optimized for capturing ID photos, and works exceptionally well for all card printing applications.

Simply plug and play and within minutes you will have quality images on your photo ID badges.

**Tripod compatible** and VOIP ready, the Credential Cam is compatible with both Mac and PC operating systems. Its 5 layer glass, true full HD 2.0 megapixel lens provides some of the sharpest webcam pictures around. The Credential Cam also includes a host of other features including bright light auto exposure, an internal microphone, 3 different stands, a protective lens cover and carrying case, and a software suite with a wide range of features.

Manufactured to the highest standards, the Credential Cam is backed by a 1 year warranty, so you can be confident that you have made the right choice.
