

brivo onairSM Cloud-based access control and video surveillance platform

Brivo OnAirSM is a suite of products comprised of our award-winning cloud platform and a complementary array of on premise physical security control devices. System programming and management is accomplished through a standard web browser logged into your Brivo OnAir account. The Brivo OnAir cloud securely communicates with our IT-compliant control devices installed at your facilities over the Internet to download operational instructions and upload event records. All event information is then securely stored at commercial-grade data centers for management and reporting purposes.

Brivo OnAirSM Protects Your Enterprise

- Cloud-based infrastructure manages physical security for one or hundreds of facilities
- Use desktop or mobile browser to set schedules for customized facility access by person, time and location
- Stay informed of critical events through programmable notifications delivered in real time via email and text
- Monitor live video streams from security cameras; review video clips linked to important events
- Ensure compliance through customized security reports delivered automatically via email on your predetermined schedule

Reduce the Complexity of Facility Security

- Eliminate local servers and software by shifting operational workload to our proven cloud solution
- Reduce business risk with our high-availability services delivered from secure, redundant data centers
- Gain the flexibility to add and delete services on demand from your own system control interface
- Replace fixed capital expenses and maintenance costs with on premise software and a predictable Software as a Service (SaaS) model

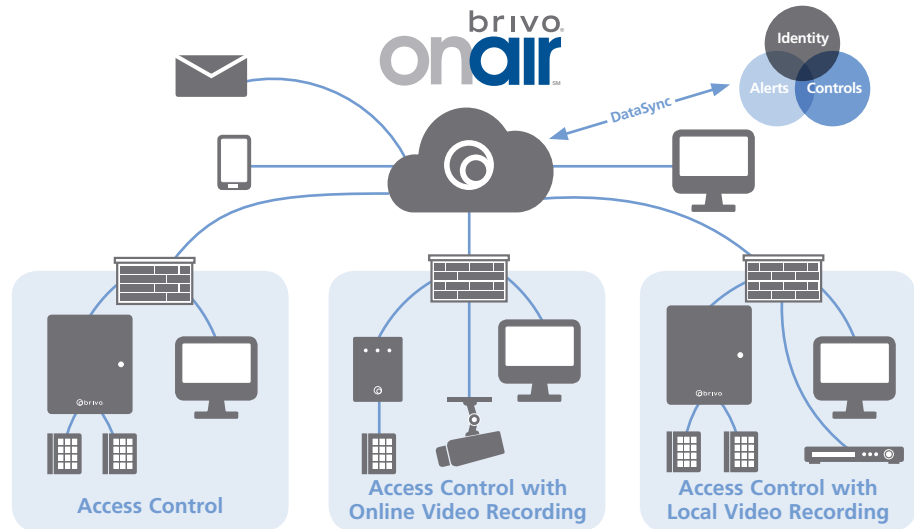

FEATURES

- Hosted access control, video and ID badging
- Unlimited site and device capacity
- Unlimited credentials and administrators
- Rules-based email and text notifications
- Automatic software updates
- Customizable reporting engine
- IT-compliant hardware and communications
- SSAE-16, Safe Harbor and TRUSTe certified
- Industry-standard security device compatibility

BENEFITS

- Lower costs
- Improved situational awareness
- Increased flexibility, reliability and resiliency
- Faster system deployment
- Enhanced policy compliance
- Future-proof functionality
- Minimal IT support required

Specifications

Supported Readers

Visit www.brivo.com/readers for more information

Supported Controllers

Visit www.brivo.com/brivoonair for more information

Browser Requirements

Latest versions typically supported. For the most current information, visit: www.brivo.com/supportedbrowsers

Communication Security

Authentication and Encryption: X.509 Certificates
Communication: 128-bit SSL

Network Requirements

TCP/IP protocols:
HTTPS (port 443)

Capacities

Active card holders	Unlimited
Max # of system-wide readers/accounts/workstations	Unlimited
Max # of custom fields	60
Firmware upgrades	Downloadable via Internet
Text message and email notifications	Configurable by site
Stored access events	Unlimited
Elevator control	Unlimited
Lockdown	By doors or user groups
Badge design and printing	Included
Anti-passback	Yes, several configuration options
Online video recorder (OVR)	Unlimited storage
DVR integration	Yes

Integration Applications

Directory Systems

Brivo Directory Agent™ simplifies personnel management by sending changes made in the directory system to the Brivo access control system. As personnel are added and managed in a corporate directory platform, Directory Agent automatically synchronizes changes with the Brivo system, reducing the risk of duplicate entries and data entry errors.

Data

Brivo DataSync® is an XML-RPC based Application Programming Interface (API) that enables the transfer of information between systems. DataSync maximizes enterprise software packages for cost savings and improved productivity by exchanging information with any Brivo system.

Wireless Locks

Brivo partners with leading wireless lock system providers for flexibility and peace of mind at an affordable price.

Biometric Access Control

Brivo partners with leading identity access technologies so you can add an additional layer of protection for your facilities.

For more information on Brivo integration options and partners visit www.brivo.com/integrate.
