

“I want peace of mind.”

- **Lockdown** functionality revokes access privileges with the click of a mouse.
- Unlimited **Schedules** provide flexible accessibility—for example, designate “In Service” days when only staff and faculty have access.

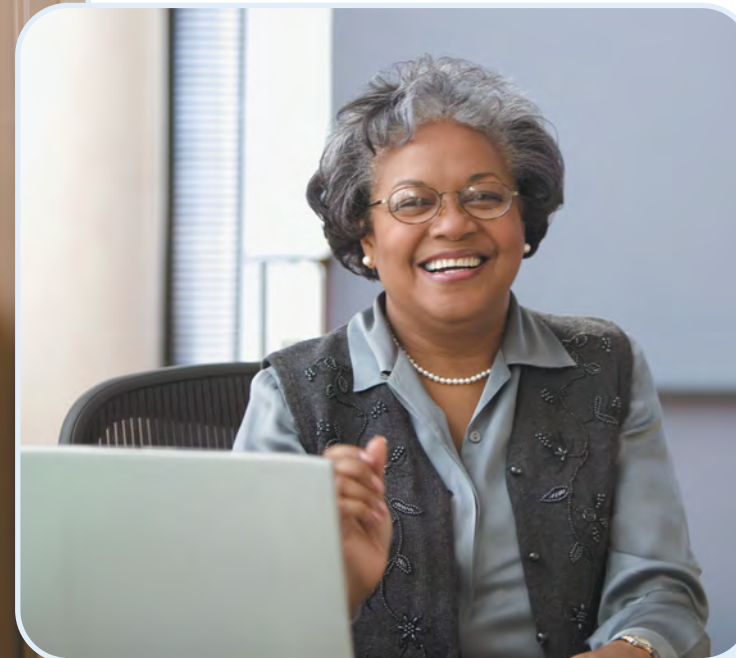

“I want control.”

- **Notifications** sent to your email or cell phone keep you informed about user activity, doors accessed, power outages, and more.
- **Reports, activity logs, and journals.** Keep an eye on your entire system and its history.
- **Set credentials to expire** to ensure guests and contractors do not have continued access after visits or jobs are completed.
- **CCTV integration** lets you view live video as well as camera action based on events such as a forced door or failed access attempt.

“I want a complete solution that fits our budget, and won’t be obsolete in a few years.”

- **No dedicated computers needed.** Brivo works through a standard Web browser.
- **No software** to buy, install, and maintain.
- **No servers or IT support required**—no worries about obsolescence or large capital expenditures.
- **No more replacing locks and keys.** Lost and borrowed keys are an unnecessary expense and unacceptable risk.

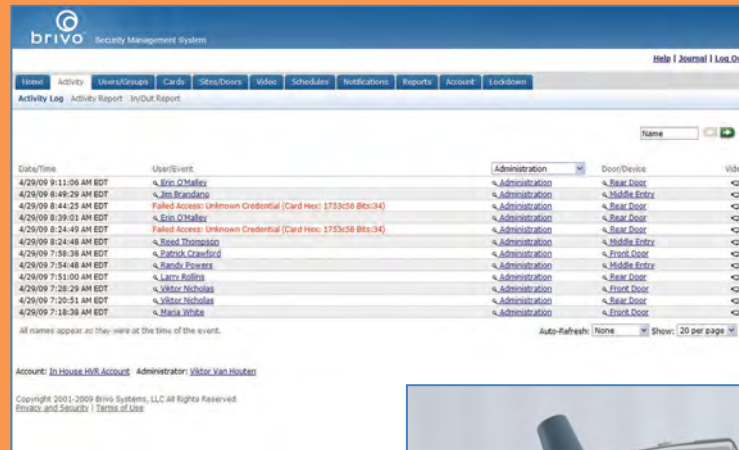

“I want Brivo.”

- **Number One in ease-of-use.** Brivo’s Web interface is familiar and intuitive. If you can browse the Internet, you can use Brivo.
- **Minimal training required.** Because it’s so easy to use, training takes minutes, not hours.
- **Remote administration.** Anywhere there’s a Web browser and Internet connection, administrators can access the system.
- **No backups, no software to keep updated.** Brivo takes care of your system with backups, virus protection, and more.
- **Less time to administer.** Easy to use and always accessible means less time is spent administering the system.
- **Web accessible management** means account changes can be made anywhere, anytime. The browser on a Mac works the same as a browser on a PC.

No software, no servers, no hassles™

Brivo Access Control Systems— Anywhere, Anytime!

« Use any Web browser to access your account.

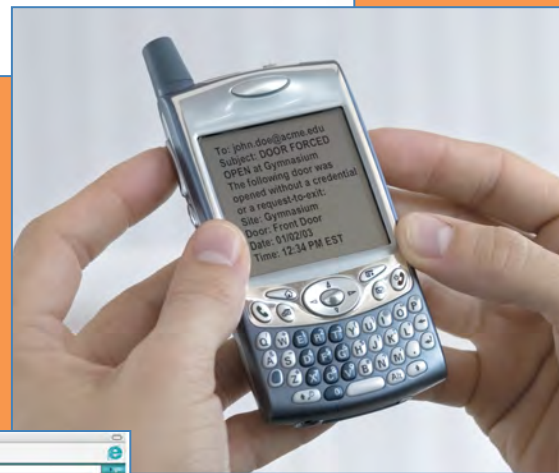

• Intuitive and easy-to-use interface has you up and running with minimal training.

• Unlimited schedules provide immense flexibility in controlling access—quickly and easily define different access on

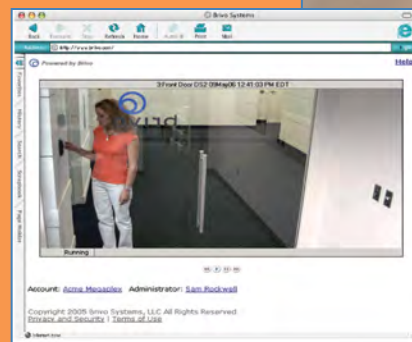

weekends, evening, holidays, special events, and more.

• Manage a single door or multiple facilities—on the same campus or across the country.

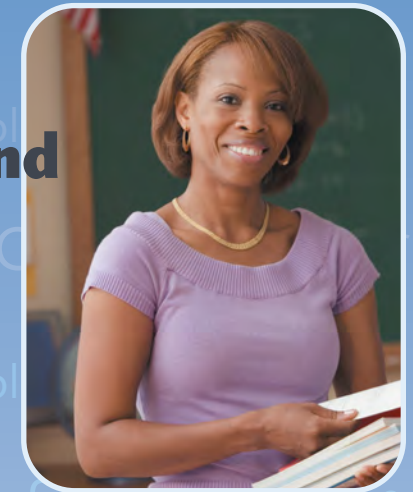

« Notifications by email or cell phone keep you current on system activity.

« Online video recorder and DVR integration provide two options so you can leverage your CCTV system with the ability to view specific events or even watch live video.

Peace of mind

Complete solution

Unprecedented Control

Ease of use
