

ELIMINATE MISSING VIDEO & REDUCE DOWNTIME ANYWHERE, ANYTIME

Idesco partnered with Viakoo to help you reduce video downtime and eliminate missing video. With Viakoo, you will be alerted to a problem that you would be unaware of otherwise, receive recommendations on how to fix the issue, get predictive analyses to identify problems before they start, and receive powerful insights into the performance of assets through KPIs and data visualization delivered to web-based dashboard or phone app.

How does Viakoo work?

- **Why choose Viakoo?**

Viakoo is the first solution to effectively address missing video and video downtime. Viakoo provides the unique ability to automatically **detect and diagnose any irregularities within the entire framework of a video surveillance system** so that immediate action can be taken. Alerts are sent instantly when abnormalities in performance are detected. You will also get full reports with powerful performance indicators.

- **Will Idesco monitor my system for me?**

Yes. We will alert you when a problem is identified to give you clear, accurate, up-to-the-minute information. We will provide recommendations on how to fix the issue, along with video network diagnostics.

- **Is Viakoo mobile-friendly?**

Yes. Android and iOS apps are available to help Viakoo subscribers access their dashboard on their mobile device. Monitor your system anywhere, anytime and get alerts sent to your phone to reduce video downtime.

- **How much does Viakoo cost?**

We will set up your custom interface and monitor your system for you for only **\$7.95 per stream** with a 1-year contract. While ensuring continuous video surveillance system operation, Viakoo effectively eliminates 100% of informational truck rolls and reduces troubleshooting time by 80%, providing significant cost reductions.
