TOPPROX PROXIMITY CARDS: Q&As

WHAT ARE THE DIFFERENT TYPES OF TOPPROX CARDS?

Our line of TopProx cards has been designed to meet all your access control requirements:

Part number	TP-1336	TP-1386	TP-1536	TP-1586
Card material	PVC	PVC	PET	PET
Magnetic stripe	Yes	No	Yes	No
Lifetime warranty	Yes	Yes	Yes	Yes

CAN I PERSONALIZE MY TOPPROX CARDS?

Yes! All our TopProx cards feature a graphics quality surface optimized for photo ID printing. Design professional ID cards with pictures, logos, text or barcodes and issue high-quality badges with your ID card printer.

If you are using a direct-to-card printer, choose proximity cards in PVC material (TP-1336 or TP-1386). For retransfer printers, we highly recommend the use of composite PVC/PET cards (TP-1536 or TP-1586).

WILL TOPPROX CARDS WORK WITH MY CURRENT READERS?

Yes. Our TopProx cards seamlessly integrate with your existing system without the need to replace readers, panels or software. Choose from a wide selection of card types, each designed to meet the specifications of your original access control system.

Our TopProx cards are a high-quality, reliable alternative for access control applications. These technology credentials allow organizations to quickly increase the level of security in both physical and logical access control systems.

HOW DO I ORDER THE SAME TYPE OF CARDS THAT I USE TODAY?

Not sure which type of proximity cards you currently use? We can help you find out the exact specs for you. Simply send us a picture of one of the proximity cards that you currently use and/or a picture of the label on your card box. You can also send us a card by mail and we will return it with the full programming information.

We will then confirm all details with you to ensure full compatibility with your system.
